Product family, history

Marcel Wanders designed a family of products for Quodes as dressing table concept: a mirror with glass shelf, 2 different dressers and the Ken stool.

Later Marcel Wanders took the iconic shape of the stool and translated this design into a side table, first with a glass top and recently with a metal top.

Elle Decoration named Ken Stool a 'Future Classic' already in 2007. In the meanwhile, we think their foresight was right!
