Satellite

Design Barber Osgerby

Materials & Finishes

Shell, shelves, and front panels

Lacquered MDF. The shell is also available in veneered MDF.

Drawers

MDF with satin Traffic White laminate.

Cable management

'Cut off' corner of the shelves providing space for cables and a cable entry in the bottom of the left and right section of each cabinet.

K-shaped base

Aluminium/ steel, powder coated in Satin Traffic White (RAL 9016). They can be lacquered in another colour on request.

Round leg

Solid oak or lacquered in corpus colour.

Wall-mounting

Possible upon request.

Colours

On the last page of this product information PDF you can find some colour suggestions. Besides those, many other RAL or NCS colours are possible, often for the same price. During the course of time the designers, Barber Osgerby, have also designed several colour combinations: images of those on request.

Product characteristics

Customization

Although Satellite has a modular design, it is a pleasure to build your customer specific cabinet. Upon request we can offer flexibility in choice of colours, dimensions, configurations, cable management and so on.

Modular design

In the pages hereafter we will explain the modular design.

The most important modular dimensions are the width of 67,5 cm and a shell height of 25 cm for lowboards and 58,5 cm for sideboards.

The feet are 8 cm high versus 25 cm of the metal bases.

Our cabinets can be prepared for wall mounting too.

Satellite comes fully mounted

Only the base or the feet are delivered separately.

Flat pack delivery

Is possible upon request.

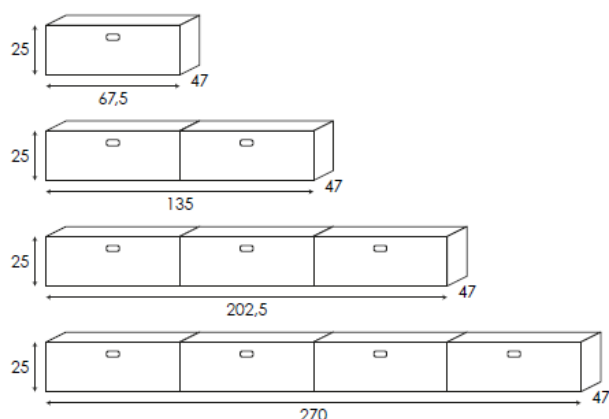

Fittings

We use top quality fittings, generally from Blum, which ensures easy adjustment all over the world by furniture professionals.

Product measurements (cm)
