Collar

Design Nendo

Image: cabinet with door L50 H80 D49 cm, bookcase L40 H160 D32 cm, chest of drawer L160 H40 D49 cm

Materials & Finishes

Bookcases

The bookcases are made of 2 mm sheet metal and are powder coated in a colour

Cabinets with doors or drawers

Shell: lacquered MDF in any regular RAL or NCS satin colour.

Front panels: aluminium, powder coated in satin traffic white RAL 9016 or lacquered in any regular RAL or NCS satin colour.

Shelves: sheet metal, powder coated in satin traffic white RAL 9016. Upon request in corpus colour. They have the same typical shape as the Collar fronts.

Drawers: laminated MDF in satin traffic white RAL 9016. Soft closing. Partial extension for increased stability.

About the 160 cm long drawers: they come with one front panel, but behind this panel you find 2 split drawer containers, see image below of Collar L160 H40 d49 cm:

All cabinets and bookcases are available as version for placement on the floor incl. adjustable feet or for wall mounting.

Colours

The bookcases are powder coated in satin traffic white RAL 9016 or graphite black RAL 9011.

It is also possible to order a minimum of 2 bookcases in a colour, available in the factory.

The cabinets with doors and drawers can be ordered in satin traffic white (base price) or in a RAL or NCS colour (2nd price level).

On the last page we suggest some matching satin colours. Other regular RAL or NCS colours are often possible for the same price.

Sustainability

All cabinets are built to last and made with the best craftsmanship, materials & fittings. They can often be disassembled and lacquered in new colours for a new life again.

Product characteristics

Collar comes fully mounted

If a cabinet will be placed on the floor, than the feet have to be mounted on the spot. Legs, doors and drawers can be adjusted for perfect horizontal alignment.

Customization

Although Collar has a modular design, it is a pleasure to build your customer specific cabinet. Nevertheless, metal parts, such as the bookcases or the frontpanels, will be more expensive if made in small batchsizes. The MDF shells of the cabinets can be adapted more easily to individually needs, such as cable management or depth.

Fittings

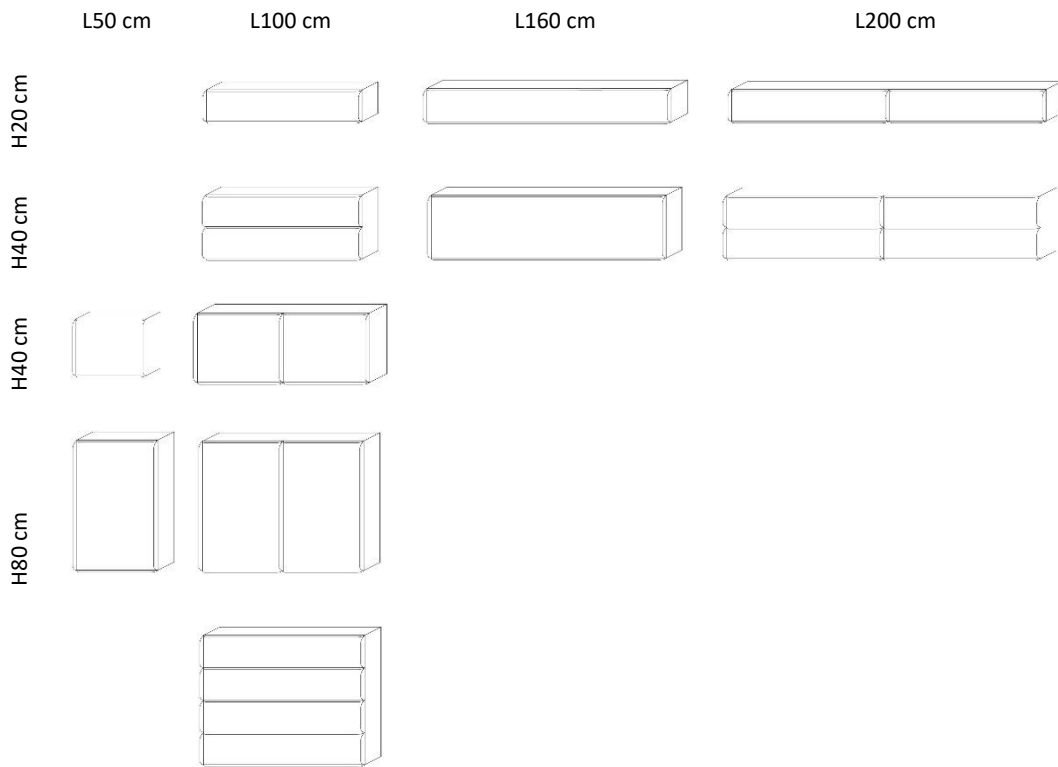

We use top quality fittings, generally from Blum, which ensures easy adjustment all over the world by furniture professionals.

Modular design

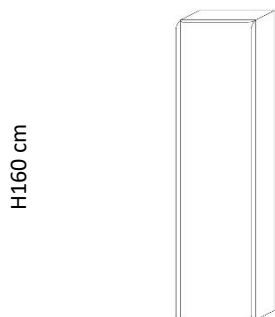

In the pages hereafter we will explain the modular design.

Colour suggestions

We can provide any other regular (as opposed to special 'effect') RAL or NCS colour; most of the time for the same price.

Colours above are indicative: colours on screen, print or lacquered differ.
